## The Geography of Eastern Canada

**FIVE NEW FILMSTRIPS** (Individual titles)

In this issue of The Classroom Screen, we present five new filmstrips and a selection of previous studies of Eastern Canada's geography.

They were designed for Canadian courses of study, at the intermediate and high school levels. They present up-to-date views of a developing area of Canada and show how geographic factors affect social and economic progress.

Among the educational advisors for filmstrips in this group were Mr. A. Carnahan, an inspector of geography studies in Ontario, and M. Aimé Guérin, geography instructor at the Jacques-Cartier Normal School, Montreal.

### 936130 THE PROVINCE OF QUEBEC —

*The St. Lawrence Region*

44 frames, color, captions and manual

Diagrams and photographs from the air and at ground level combine to show the prevailing geographical features and how they shape the life of Quebec's St. Lawrence region today.

### 936140 THE PROVINCE OF QUEBEC —

*The Laurentian Region*

41 frames, color, captions and manual

This filmstrip deals with the Laurentians, the Saguenay, the Abitibi and Temiskaming, up to the settlements of the far north where mining, lumbering and agriculture continue to expand. Here your students will see places and activities that every day register on the day's news: Manicouagan and its immense dam, Schefferville and Seven Islands, source of the vast iron-ore wealth, and older places like Arvida, Rouyn, Noranda.

### 936152 THE PROVINCE OF QUEBEC —

*The Appalachian Region*

39 frames, color, captions and manual

A study of the varied and highly picturesque region that includes the Gaspé coast, the south shore of the St. Lawrence and the Eastern Townships.

### 936151 THE GEOGRAPHY OF THE PROVINCE OF NEWFOUNDLAND AND LABRADOR

47 frames, color, captions

The new photographs by Jean de Vissar, six special maps, and the latest facts and figures on the Province's growth combine to make this filmstrip an important one for your lessons.

### 936840 RIVER CITY

42 frames, color, captions and manual

A study of the port of Montreal, produced for the Department of Mines and Technical Surveys in the *Cities of Canada* filmstrip series, this filmstrip combines key pictures of the city, past and present, with maps and diagrams to show the growth and vitality of this Canadian metropolis.

# a selection of previous filmstrips about the Geography of Eastern Canada

NFB filmstrips may be purchased either as individual titles or in sets (which are identified as such).  
Purchased individually, these color filmstrips cost \$4.00 each.  
When a complete set of filmstrips is purchased, a 10% discount is allowed.  
Purchase orders should be addressed to: Canadian Division, National Film Board of Canada, P.O. Box 6100, Montreal 3, Que.  
A reply order card is enclosed for your convenience.

## SET: THE ATLANTIC REGION

(6 filmstrips)

- 36183 **INTRODUCING THE ATLANTIC REGION**  
43 frames, color, captions and manual  
Fine photographs, showing the character of this entire region.
- 36195 **THE ATLANTIC REGION: DEEP-SEA FISHING**  
31 frames, color, captions and manual  
Grand Banks fishing with electronic sounding-equipment and otter-trawl nets.
- 36193 **THE ATLANTIC REGION: FROM THE SEA**  
53 frames, color, captions and manual  
The various methods employed in the great Atlantic fishing industry are shown, including the packaging of fish in modern freezing plants.
- 36191 **THE ATLANTIC REGION: FROM FOREST AND FARM**  
47 frames, color, captions and manual  
The harvests of mountains and valleys in Canada's Atlantic region.
- 36192 **THE ATLANTIC REGION: FROM MINE AND RIVER**  
38 frames, color, captions and manual  
Traditional industries of coal and iron, and the development of water power.
- 36194 **THE ATLANTIC REGION: TRANSPORT**  
37 frames, color, captions and manual  
Transportation, by road, rail, air and sea, from early seafaring days to the present.

## SET: THE GREAT LAKES - ST. LAWRENCE LOWLANDS

(6 filmstrips)

- 36181 **INTRODUCING THE LOWLANDS**  
57 frames, color, captions and manual  
An over-all view of the region's geological, economic and social development.
- 36810 **OTTAWA — CANADA'S CAPITAL**  
44 frames, color, captions and manual  
Produced for National Capital Commission, a study of Ottawa, its growth and its future.
- 36101 **MANUFACTURING IN THE LOWLANDS**  
48 frames, color, captions and manual  
From Quebec to Windsor, the extent and diversity of manufacturing in Canada's most industrialized area.
- 36196 **THE SEAWAY**  
51 frames, color, captions and manual  
The St. Lawrence Seaway, its origin, its economic importance, and its construction.
- 36182 **SHIPS AND POWER**  
42 frames, color, captions and manual  
Shows the industries served by the Seaway and the development of hydro-electric power.
- 36100 **STEEL AND THE AUTOMOBILE**  
47 frames, color, captions and manual  
How a car is made and where the steel comes from.

## CITIES

(Individual titles)

- 36812 **INDUSTRIAL CITY**
